PROFESSIONAL SUMMARY

Computer Engineering graduate with professional experience building Python services, REST APIs, data workflows and SaaS integrations. I use FastAPI, Docker, AWS, pytest and GitLab CI/CD in day-to-day work. My other work includes Django and Node.js apps with SQL and NoSQL databases.

PROFESSIONAL EXPERIENCE

VeroDigital | Python Backend & Integration Developer | Sep 2025 - Present

Python | FastAPI | REST & GraphQL APIs | Docker | AWS | SQL Server/ODBC | pytest | GitLab CI/CD

- Build Python services, data workflows and SaaS integrations for HR, ERP, accounting and construction platforms using FastAPI, REST and GraphQL APIs, OAuth, webhooks and SQL/ODBC.
- Develop Dockerized backend tools and CLI workflows with data mapping, validation, retries, duplicate checks, error handling and reporting.
- Maintain shared Python components for API clients, configuration, structured logging and parallel processing. Reuse connection helpers for S3, SMTP and ODBC.
- Write unit, API and integration tests with pytest and ship work through GitLab CI/CD in a remote team using code reviews, documentation and AWS-based workflows.

Bulutsoft | Digital Image Processing Intern | Jan 2024 - Mar 2024

Python | PyTorch | TensorFlow | OpenCV | CNNs

- Trained CNN models with TensorFlow and PyTorch for face recognition and tracking.
- Built real-time OpenCV camera pipelines and added them to desktop and web tools for authentication and attendance.

Bulutsoft | Full-Stack Developer Intern | Jul 2023 - Sep 2023

- Built React and Node.js features with JWT authentication, REST APIs, MongoDB, Docker and AWS EC2.

SELECTED PROJECTS

Data Processing Service | Python, FastAPI, httpx, pandas, openpyxl

- Built an async FastAPI service and command-line workflow that combined CSV uploads with authenticated API data then generated formatted Excel reports. Added parallel metadata lookups, duplicate removal and a health-check endpoint.

Healem - Built REST APIs for appointments, messaging and health records with Express and MongoDB, including JWT access control, input validation and rate limiting. Ran the app with Docker Compose and added a health endpoint.

Foodagram - Django app for image and video checks using ResNet50, frame analysis and similarity scoring.

Voice Assistant API - FastAPI service for audio uploads and Whisper transcription with bilingual text and optional speech output. Added input checks, error handling and CPU/GPU fallback.

TECHNICAL SKILLS

Backend Development: Python, FastAPI, Django, REST APIs, GraphQL, OAuth, JWT, webhooks

Data & Automation: SQL Server, ODBC, MongoDB, pandas, openpyxl, asyncio, CLI tools

Testing & Delivery: pytest, unit/API/integration testing, Docker, Git, GitLab CI/CD, AWS

Web: JavaScript, HTML, CSS, Node.js, React

Computer Vision: PyTorch, TensorFlow, OpenCV, YOLO

English: C1 (IELTS 7.5, 2023)

EDUCATION

Antalya Bilim University | B.Sc. in Computer Engineering | 2021 - 2025

GPA: 3.76/4.00 | Ranked among the top 3 students in the department
